HP Webcam HD-4110

Stay at the centre

The HP Webcam HD-4110 is perfect for recording and posting videos on YouTube, taking photos, blogging and more. Get all your friends on the widescreen and stay sharp with autofocus and HP TrueVision.

- **Do all your stuff in Full HD**

Get filming! The HP Webcam HD-4110 is a Full HD 1080P autofocus widescreen 16 x 9 webcam which can record up to 30 frames per second – perfect for posting your videos to YouTube, chatting, blogging, taking photos and e-mailing.

- **Stay at the centre of things**

Make sure you stay at the centre of the webcam's picture with automatic face tracking, and include all your friends on the widescreen. A clear glass lens and autofocus keep the image sharp, while colours stay accurate with automatic white balance.

- **Keep the picture lifelike**

Don't let poor lighting spoil your chatting experience. The webcam has integrated HP TrueVision to deliver an improved low light video performance, while built-in adaptive lighting automatically adjusts with changing light conditions.

- **Post it on YouTube**

Posting videos to YouTube is easy: just press three buttons and you're done. Adjust the webcam till you get just the right angle, and let the digital microphone filter out unwanted noise. And the flexible clip means you can film from almost anywhere.

- **Capture the moment**

The webcam has comprehensive software so you can record and take photos with ArcSoft Webcam Companion 3. Use Magic! Visual Effects 2 to enhance videos, photos and online chats with special effects and fun frames, and ShowBiz for creative editing.
